

Organic Quality Control Technician/Chemist

We are seeking a full time QC Chemist to join our team. To succeed in this role the candidate will perform analysis in a busy environment and work independently. The quality control chemist is responsible for qualitative and quantitative analysis of batches of Chemical Reference Standards, ensuring that our customers receive the best quality product available.

Key Responsibilities:

- Perform analysis by GC, GC/MS, and/or LC and LC/MS
- Analyze data to ensure compliance with acceptance criteria
- Routine maintenance of instruments
- Work with other chemists and the production department to troubleshoot any issues that arise
- Maintain accurate records in our database to ensure traceability

Qualifications:

- Minimum 2 years of laboratory experience
- Demonstrated familiarity with organic analytical instrumentation and analysis of various chromatographic methods
- Demonstrated proficiency with Agilent ChemStation software

Preferred Experience

- USEPA methods
- LIMS management
- Quality Systems

Details and Benefits:

Details:

- Job Type: Full-time on-site
- Pay Range depending on experience
 - Evaluation after 3 months and then annually
 - Annual bonus
 - Paid Holidays, Vacation, Personal, and Sick Days

Benefits:

- Health and Dental insurance are fully covered by AccuStandard for employees and their family
- Life insurance
- 401(k) with employer matching
- Student loan forgiveness program
- Tuition reimbursement

Schedule:

- Must be able to commute to New Haven, CT
- 8 hour shift, Monday to Friday
